

IMPROVEMENT DOCUMENT TEAM_C

- The website needs better overall design to make it look appealing. The titles and headings look too simple and don't stand out. This work needs to be done on Core competencies and vision.
- While hovering over the headings it should be highlighted, especially in the navbar when the user is on homepage. The navbar should be fixed for every single page we visit.
- Names of the events we conduct should be mentioned on the first page.
- The upcoming events should be updated on the home page. The website needs to have recent updates and new photos.
- The book section can be designed better instead of direct pdfs stuck to the page. First the name of the book with the cover page and some info about that book.
- More use of animation, gifs and effects for appearing text boxes. The website has too much static text and moving images.
- The gallery has too many repetitive photos. Lesser photos would look better.
- Contact-us email not working shows error. We have added this section on homepage.
- It takes a lot of time for the website to load. Not secure message is shown.
- Blog section is empty.
- Problems on opening website on phone
 - 1) "Communiqué IIT Kharagpur The Official Soft Skills & Personality Development Society" not visible.
 - 2) The navbar button on right top is not visible before clicking
 - 3) Executive team info automatically scrolls and repeats in a loop. Static or manually scrollable would be better to read on mobile. Seems good on pc but not on Phone.
